I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

COMMENTS: I have been using a compounded prescription for nearly one year. My premenopausal symptoms were quite severe and they are now completely under control. I have experienced no side effects from the medication - unlike commercial prescriptions I had taken with significant side effects.

PLEASE keep the availability of compounded prescriptions an option for women. Do not put an end to something that is working well and a wonderful resource for us! Thank you!
